## Program Evaluation Learning Resources

### [World Happiness Report by John F. Helliwell, Richard Layard and Jeffrey D. Sachs](#)

The World Happiness Report is a landmark survey of the state of global happiness that ranks 156 countries by how happy their citizens perceive themselves to be. This year's World Happiness Report focuses on happiness and the community: how happiness has evolved over the past dozen years, with a focus on the technologies, social norms, conflicts and government policies that have driven those changes.

### [Women, Business and Law 2019: A Decade of Reform by World Bank Group](#)

Women, Business and the Law 2019: A Decade of Reform examines numerous questions by building a time-series measuring gender discrimination across 187 economies over the past ten years. With the understanding that women's access to employment and entrepreneurial activity is related to many factors, this study focuses on how women must navigate discriminatory laws and regulations at every point in their careers, limiting their equality of opportunity. To gain new insight into how women's employment and entrepreneurship choices are affected by legal gender discrimination, this study examines ten years of Women, Business and the Law data through an index structured around the economic decisions women make as they go through different stages of their working lives. This perspective yields interesting results. Six economies—Belgium, Denmark, France, Latvia, Luxembourg and Sweden—score 100 in the Women, Business and the Law index, meaning they give women and men equal legal rights in the measured areas. A decade ago none of these economies scored 100, indicating they all reformed over the past ten years.

The average global score is 74.71, indicating that a typical economy gives women only three-fourths the legal rights of men in the measured areas. For example, the average score in the Middle East and North Africa is 47.37, meaning the typical economy in that region gives women less than half the legal rights of men in the measured areas. Another way to interpret this information is the average economy does not give women equality of opportunity in approximately nine of the 35 data points examined in the index. And in the Middle East and North Africa the average economy does not give women equality of opportunity in approximately 17 of the 35 data points examined.

The Women, Business and the Law index is based on statistically significant associations with outcomes related to women's economic empowerment, in particular with women's labor force participation as well as with other outcomes of interest. In addition to the association of indicators with outcomes, Women, Business and the Law employs a thorough review of the economic literature to support each indicator. This review demonstrates how legislation influences women's equality of opportunity during different phases of their working lives and affects economic outcomes. Finally, each Women, Business and the Law indicator is supported by the international legal framework on women's human rights as set out in the Convention on the Elimination of All Forms of Discrimination against Women (CEDAW).

[The Right to Water Harrowing Journeys: Children and youth on the move across the Mediterranean Sea, at risk of trafficking and exploitation by IOM](#)

For children and youth on the move via the Mediterranean Sea routes to Europe, the journey is marked by high levels of abuse, trafficking and exploitation.

Some are more vulnerable than others: those travelling alone, those with low levels of education and those undertaking longer journeys. Most vulnerable of all are those who come from sub-Saharan Africa.

These findings come from a new UNICEF and International Organization for Migration (IOM) analysis of the journeys of some 22,000 migrants and refugees, including some 11,000 children and youth, interviewed by IOM.
